You can get a 3-month supply of your medication mailed to you with no cost for standard shipping. Just call the phone number on your OptumRx member ID card, and ask for home delivery.

Under the health reform law (Affordable Care Act), pharmacy benefit plans must cover certain Preventive Care Medications at 100% - without charging a copay, coinsurance or deductible.

These products include:

Food and Drug Administration (FDA)-approved prescription and Over-The-Counter (OTC) birth control (contraceptives) for women

To follow this law, OptumRx is offering this updated list of no-cost Preventive Care Medications. You can use your OptumRx member ID card to get the products on this list for no cost if they are:

- Prescribed by a health care professional
- Age- and condition-appropriate
- Filled at a network pharmacy

These products are available at no cost to you on both standard and high-deductible or consumer-driven health plans. To find a network pharmacy, login to **optumrx.com**, select “Pharmacy Locator” on the right hand side of the screen and enter your zip code or call the number on your OptumRx member ID card. If you get these drugs or products from an out-of-network pharmacy, you will have to pay the full cost for them. Male forms of birth control are not currently considered Preventive Care Medications under the Affordable Care Act.

1. Please note this list is subject to change.
2. Always refer to your benefit plan materials to determine your coverage for medications and cost-share. Some medications may not be covered under your specific benefit. Where differences are noted, the benefit plan documents will govern.
3. All branded medications are trademarks or registered trademarks of their respective owners.
4. The listed age limits are based on U.S. Preventive Services Task Force Recommendations; coverage for additional populations may also apply as required.
5. When informed, an issuer must accommodate any member when one of the zero cost contraceptives may be medically inappropriate as determined by the member's health care provider and waive the otherwise applicable cost-sharing for a contraceptive not currently covered at zero cost.
6. If your pharmacy benefit plan is grandfathered under the ACA, these drugs may be covered at the normal cost-share
